---

## SUMMARY

---

Currently performs basic to moderately-difficult design/drafting assignments requiring a working knowledge of design/drafting standards, practices, and techniques. Under the general direction of a higher-level Designer/Drafter, I will typically take engineering notes, specifications, rough sketches, etc., and formalize them into working drawings. Work assignments are designed to develop a practical knowledge of equipment, facilities, and systems, and their interrelationships within a mechanical/petroleum engineering discipline.

---

## EXPERIENCE

---

### Mechanical Drafter

Parsons Inc.

June 2018 - Current, Midland, Texas

- Utilizes a CAD workstation to prepare engineering drawings consisting of basic arrangements, layouts, flow sheets, assemblies, isometrics, etc., from rough sketches and/or from general engineering and design information according to established standards and procedures.
- Utilizes technical manuals and directives to ensure compliance with codes and company policies. Becomes familiar with various standards and codes such as ANSI, PFI, and ASME.
- Compiles data and performs dimensional and routine calculations required for the preparation of drawings. Understands how to read orthographic (2D) and/or isometric (3D) designs and supplier/manufacturer drawings.
- Field walk-down experience includes 4 Central Tank Batteries, 3 Compressor Stations and 90 wellheads.

### Operations Manager

JJM Farms

May 2012 - June 2018, Dexter, New Mexico

- Second in command of the farm and its entities. This included a partnership with the owner Michael Berry, for AG Enterprises that managed all chemical and fertilizer applications for JJM Farms.
- Managed the water table usage on each farm in accordance with New Mexico State Law.
- During peak season, would handle the alfalfa and cotton production. Typically around 1000 acres of alfalfa and 300-500 acres of cotton.
- Kept track of the crops and their production through Microsoft Excel.

### Warehouse/Truck Driver

Bills Distribution

June 2011 - May 2012, Anchorage, Alaska

- Warehouse duties would consist of pulling stock and preparing them for delivery.
- Truck driving duties would typically take place every other day. Deliveries consisted mostly of soft drinks and energy drinks to convenience stores/supermarkets.

### Farmhand

JJM Farms

February 2010 - May 2011, Dexter, New Mexico

- In charge of alfalfa equipment and its maintenance.
  - Depending on what season and crop, would be placed in charge of the tillage and planting for said crop.
  - Helped with recording and upkeep of Artesian/shallow wells.
- 

## PROJECTS

---

### Volunteering for Aid/Humanitarian Work

- Every summer from 2006-2009, I would volunteer through a local church to help an area in need.
  - In 2006 I helped build a house for a family of 8 in Juarez, Mexico. Everything from the foundation to the roof was completed within one week.
  - In 2007 I helped with the reconstruction of a home in New Orleans, Louisiana that was affected by Hurricane Katrina.
  - In 2008 I went to Denver, Colorado for Humanitarian work with the homeless population. Also did some work with unprivileged children.
  - In 2009 I helped with the reconstruction of a home in Galveston, Texas that was affected by Hurricane Ike.
- 

## EDUCATION

---

### High School Diploma

Dexter High School • Dexter, New Mexico • 2009

---

## SKILLS

---

AutoCad Plant 3D

Revu BlueBeam

Microsoft Excel/Word
